

How can I access these opportunities?

To be considered for all employment and training opportunities on site **you must complete our Employment and Training Registration Form.**

This is a standard registration form to capture people's contacts, skills, qualifications and areas of interest.

You can complete and submit a registration form on our project website:
www.nwbicester.co.uk

Or you can obtain a hard copy from Job Centre Plus, Bicester Job Club, CDC Town Centre Office, or Bicester Library.

By registering your details they will be kept on file and you will **become part of a pool of local labour** that both contractors now and in the future working on NW Bicester can call upon as appropriate, when opportunities arise.

What happens next?

Some trades will be required on site earlier than others, so you will only be contacted when appropriate opportunities arise in the trades that you have expressed an interest in.

On the **first phase recruitment will range from October 2014 to August 2015**, with apprentices, work placement and work experience opportunities being delivered in-line with the on-site trades.

Job and training opportunities will continue throughout the **5 year construction of the Exemplar and beyond.**

By registering your details will be recorded on our database and shared with other potential employers from across the wider project team to be considered on all phases on NW Bicester.
